United States Department of Agriculture Bureau of Markets

FOOD SURVEYS

Published by Authority of the Secretary of Agriculture

WASHINGTON, D. C.

OCTOBER 26, 1918.

VOL. II, No. 13

ANNOUNCEMENT.—In accordance with the provisions contained in Section 2 of an Act of Congress (Public No. 40, 65th Congress) approved August 10, 1917, the Chief of the Bureau of Markets of the United States Department of Agriculture has been authorized and instructed, as an agent of the Secretary of Agriculture, to take such steps as may be necessary to obtain authoritative information regarding the matters authorized to be investigated under that section.

The Food Surveys Project has been established pursuant to Sections 2 and 8, of the Act, to obtain such information concerning food and food materials as may seem necessary or desirable for the guidance of governmental agencies and the public in

making plans for increasing production, for promoting efficient distribution, and for directing conservation and utilization.

The results of the surveys made under this Project will be published monthly in "Food Surveys," which will be mailed from Washington, D. C., between the fifteenth and twentieth of each month. Special numbers of "Food Surveys" will be issued from time to time as occasion may require. A copy may be obtained on application to "Food Surveys," Bureau of Markets, Room 229, Homer Building, Washington, D. C.

CHARLES J. BRAND, Chief, Bureau of Markets.

C. W. THOMPSON, In Charge, Food Surveys Project.

COMMERCIAL STOCKS OF GRAIN, FLOUR, AND MISCELLANEOUS FOOD PRODUCTS IN THE UNITED STATES ON OCTOBER 1, 1918

This report covers four groups of commodities, as follows:

1. Wheat, corn, oats, barley, and rye.
2. The various kinds of flour, and corn meal. Concerning stocks of the commodities in groups 1 and 2, reports were required from elevators and grain warehouses, grain mills, wholesale dealers, and general warehouses.
3. A group of miscellaneous non-perishable food products. For these commodities, the stocks of wholesale grocers and general warehouses were obtained, and for beans the stocks of elevators and

wholesale grain dealers also. Small quantities of these commodities reported by cold storages are included in the figures shown for general warehouses.

4. Condensed and evaporated milk, for which the stocks of condensaries, cold storages, warehouses, and wholesale grocers were obtained.

The figures given in this report, as in earlier monthly reports, include quantities known to be in transit and expected to arrive within a reasonable time after the date of the Survey.

Table 1.—Stocks reported for October 1, 1918, by classes of business.

(Since a number of firms failed to submit their reports in time for tabulation, the figures given below fall somewhat short of being complete.)

COMMODITY.	TOTAL.		ELEVATORS AND GRAIN WAREHOUSES.		GRAIN MILLS.		WHOLESALE GRAIN DEALERS.		GENERAL WAREHOUSES.		WHOLESALE GROCERS.

* The "Firms reporting," as shown in the tables, are the firms which reported actual stocks of the commodity in question. A considerable number of other firms submitted reports indicating that their stocks of specified commodities were entirely exhausted. Thus 1,120 firms reported that they had no wheat in stock on October 1, 1918, making a total of 14,099 firms from whom reports were received regarding stocks of wheat.

† The stocks of condensed and evaporated milk held by cold storages are given here for the first time, the reports for previous months showing only the stocks held by condensaries, general warehouses, and wholesale grocers. Small stocks of other commodities reported by the cold storage establishments have been included with the general warehouse stocks.

The number of firms reporting stocks of each commodity and the total quantities reported are shown in the first two columns of Table 1. The succeeding pairs of columns give similar information for each class of business concerns considered separately.

The figures indicate that more than seven-tenths of the wheat and the corn was reported by the elevators and grain warehouses, while the bulk of the remainder was reported by the grain mills. In the case of oats, barley, and rye, the elevators and grain warehouses held fully five-sixths of the stocks reported.

Passing to the second group of commodities, namely, flour and corn meal, it may be seen that of the 5,466,423 barrels of white wheat-flour reported by all classes of concerns, approximately three-tenths was held by the wholesale grocers and almost the same fraction by the grain mills. Nearly one-half of the whole-wheat and graham flour and more than one-third of the stocks of barley flour were reported by the wholesale grocers. In the case of rye flour, corn flour, and corn meal, the wholesale grocers and the grain mills reported the largest stocks, while the wholesale grocers held nearly one-half of the stocks of buckwheat flour reported and more than one-half of the mixed flour.

More than two-thirds of the beans were reported by the wholesale grocers, and most of the remainder by the warehouses. Nearly three-fourths of the rice reported was held in general warehouses, the balance being in the hands of the wholesale grocers. The wholesale grocers also reported nine-tenths of the stocks of rolled oats and canned corn, four-fifths of the sugar and canned tomatoes, and about two-fifths of the canned salmon, the remainder in each case being reported by the general warehouses.

The figures for the fourth and last group of commodities indicate that a little less than two-fifths of the condensed milk reported was held by the condensaries, and that the cold storages, general warehouses, and wholesale grocers each held about one-fifth of the total. In the case of evaporated milk, the condensaries held a little more than one-third of the total, the wholesale grocers held about 45 per cent, and the warehouses most of the remainder.

About five-sixths of the firms reporting gave information for October 1, 1917, as well as for October 1, 1918. Table 2 presents comparative figures for the stocks on these dates, based on the returns from those firms that reported their stocks for both dates. The table also shows what percentage the 1918 stocks represented of the stocks held by the same firms on October 1, 1917.

Thus the stocks of wheat on October 1, 1918, as indicated by the table, were equal to 297.6 per cent of those reported for the same date last year, or nearly three times as large. This increase of 197.6 per cent in the commercial stocks on hand October 1, 1918, as compared with the similar stocks on October 1, 1917, would seem to be due mainly to the increased yield of the current year, supplemented by the earlier season and the more rapid movement of grain into commercial channels. The commercial stocks of corn, oats, and rye on the date of the Survey were larger by 175.4 per cent, 27.7 per cent, and 52.7 per cent, respectively, than those held by the same firms a year earlier.

The holdings of white wheat-flour reported for October 1, 1918, were 31.0 per cent larger than those of a year earlier. Corn meal and all the other flours except buckwheat flour, show material increases in stocks on hand for the current year as compared with the stocks of October 1, 1917, the percentages representing the current stocks in terms of the corresponding stocks of a year ago being as follows: Whole-wheat and graham flour, 155.9 per cent (an increase of 55.9 per cent); rye flour, 237.1 per cent; corn meal, 219.1 per cent; buckwheat flour, 106.9 per cent; and mixed flour, 176.0 per cent. The stocks of barley flour were nearly 18 times as large as the 1917 stocks, and those of corn flour nearly ten times as large.

In the case of the miscellaneous non-perishable food products referred to above as group 3, the stocks of rice, canned corn, and canned salmon showed considerable decreases, as compared with the stocks of a year ago, while the stocks of rolled oats and canned tomatoes showed material increases, and the holdings of beans and sugar somewhat smaller increases.

Table 2.—Stocks reported for October 1, 1918, with comparative figures for 1917, by classes of business.

The current stocks of these commodities represent the following percentages of the stocks on hand one year ago: Beans, 109.3 per cent; rice, 37.7 per cent; rolled oats, 158.6 per cent; canned salmon, 79.0 per cent; canned tomatoes, 126.0 per cent; canned corn, 85.6 per cent; and sugar, 105.9 per cent.

The commercial stocks of condensed milk reported for the date of the Survey represented 106.8 per cent of the stocks held by the same firms one year earlier, while the stocks of evaporated milk reported for October 1, 1918, were 78.2 per cent of the stocks on hand October 1, 1917. The table also gives comparative figures for the holdings of each of the classes of firms reporting.

Table 3 shows the stocks reported for October 1, 1918, by geographic divisions and states. Table 5 gives comparative figures for October 1, 1918, and October 1, 1917, by geographic divisions, for

the combined stocks of the several classes of concerns reporting, and Table 6 gives, by geographic divisions, the 1918 stocks of each of these classes of concerns separately.

Table 3.—Stocks reported for October 1, 1918, by geographic divisions and states.

Table 4 presents in convenient form for comparison the commercial stocks of cereals as reported in the Food Survey of October 1, 1918, and the commercial visible supply figures as published by the Chicago Board of Trade and by Bradstreet for approximately the same date (September 28). The figures for the Chicago Board of Trade cover only about twenty primary market and port cities,

and those of Bradstreet include, in addition to these points, a certain number of minor interior markets, or about fifty cities in all. The Food Survey returns, on the other hand, cover commercial stocks in the hands of the specified classes of business concerns throughout the country.

Table 3.—Stocks reported for October 1, 1918, by geographic divisions and states—Concluded.

GEOGRAPHIC DIVISION AND STATE.	Buckwheat flour.	Mixed flour.	Beans, dry edible.	Rice.	Roll'd Oats.	Canned salmon.	Canned tomatoes.	Canned corn.	Sugar.	Condensed milk.	Evaporated milk.

SUMMARY OF COLD STORAGE REPORTS FOR OCTOBER 1, 1918, ISSUED BY THE COLD STORAGE DIVISION OF THE BUREAU OF MARKETS

The accompanying tables (Tables 7 and 8) summarize the data for October 1, 1918, assembled by the Cold Storage Division of the Bureau of Markets. Information of this kind is secured for each month and is given out in the first instance in the form of special reports upon individual commodities or groups of commodities, issued about the 10th of the month. These reports, covering the whole list of commodities or any specific item, will be sent regularly upon request to any person interested; or the information will be telegraphed immediately upon its release, if so requested. The reports are free, except for the telegrams, which are sent charges collect.

As a few storages have failed to respond to the inquiries sent them, the figures given below do not include all holdings.

Table 7.—Cold storage stocks reported for October 1, 1918, with comparative figures.

COMMODITY.	TOTAL STOCKS REPORTED FOR OCTOBER 1, 1918.		COMPARATIVE FIGURES FOR OCTOBER 1, 1918, AND OCTOBER 1, 1917.				COMPARATIVE FIGURES FOR OCTOBER 1, 1918, AND SEPTEMBER 1, 1918.				COMPARATIVE FIGURES FOR OCTOBER 1, 1917, AND SEPTEMBER 1, 1917.
